

WORLD INTERNET CONNECTIVITY

Only a third of the world has meaningful 24/7 high-speed connection. Two thirds have no or unreliable access.

Fully Connected

- Ability to share
- Monthly subscriptions
- High speed internet
- Access 24 hours a day
- Have no bandwidth limit

Lacking Connection

- Travel long distances for access
- Use connection in Internet cafes
- Expensive and infrequent use of internet access

WHO WE SERVE

- Offline Information Solutions focus on those who are not connected or have sketchy connections.
- Those with sketchy connectivity can adopt a hybrid model where key education or professional information is always and immediately available on their device.
- For those without connectivity, offline information can be life-changing and expand their worlds and opportunities.
